

NEW JERSEY STATE DEPARTMENT OF ENVIRONMENTAL PROTECTION**MEMO**TO Ron CorcoryFROM Vince KrisakDATE May 8, 1984SUBJECT Arkansas Company, Incorporated

The referenced company was inspected on April 30, 1984. The inspection revealed numerous environmental problems at the site (see the attached inspection report).

All operations at the facility have ceased. Numerous full and partially full drums of chemicals were left on site. Without sampling the drums, we are assuming that the labeling is correct and the contents are hazardous.

At the present time the site is not secure and the potential for severe environmental damage is real, in the event of a fire or vandalism.

Due to the condition and location of the drums, it is recommended that a Directive Letter be issued to the property owner to identify the material stored on site and to clean up and dispose all hazardous materials on site.

Also, due to the fact that the Arkansas Company, Inc. has filed for bankruptcy it is recommended that the case be referred to ECRA for their information and investigation.
